EDUCATION

Zhejiang University (ZJU)	Hangzhou, China
B.S. in BusinessBigDataAnalysis	Sept. 2023 – June 2027 (Expected)
(Statistics–DoubleDegreeinInformationManagementandInformationSystem)	

- **GPA:** 3.73/4.0
- **Selected Coursework:** Throughout my undergraduate studies, I have built a robust academic foundation by completing a rigorous curriculum. This includes core mathematics such as Mathematical Analysis, Linear Algebra, and Probability & Stochastic Processes, alongside specialized CS courses including Data Structures, Computer Networks, and Database Systems. Furthermore, I have developed advanced technical expertise in Data Mining, Unstructured Data Analysis, and Data Visualization, complemented by hands-on proficiency in C, Python, and Web Development.

AWARDS & HONORS

Academic & Research Excellence	
• Gold Medal , China International College Students' Innovation Competition (Zhejiang)	2025
• Third Prize , 17th Chinese Mathematics Competitions (CMC)	2025
• Second Prize , RoboRoarZ Robotics Competition, Singapore	2024
• Second Prize , ZJU Intelligent Robot Design Competition	2024
Scholarships & Personal Honors	
• Outstanding Student Honor & Academic Excellence Scholarship, ZJU	2024
Extracurricular & Athletics	
• Champion , Dragon and Lion Dance, ZJU "Three-Good Cup"	2024
• 6th Place , Women's Discus, ZJU Track and Field Games	2023

PROJECT EXPERIENCE

RAG-based Academic Literature Retrieval Engine	Jan. 2026 – Present
<i>Core Developer — Zhejiang University AIMLab Innovation Project</i>	Python, LLM, Vector DB
• Developed an advanced retrieval system utilizing Retrieval-Augmented Generation (RAG) to facilitate efficient academic discovery across tens of thousands of research papers. • Implemented Semantic Search and Vector Database integration to achieve high-precision context retrieval for complex academic queries. • Integrated Large Language Models (LLMs) to automate the synthesis of literature and generate intelligent explanations, streamlining the research workflow for scholars.	
AI Teaching Assistant Extension for PTA Platform	Jan. 2025 – Dec. 2025
<i>Co-Developer — University-level SRTP Project, Zhejiang University</i>	JavaScript, LLM, Web Dev
• Designed and deployed a commercialized AI+Education browser extension, providing real-time debugging feed-	

back and personalized learning suggestions for students on the PTA programming platform.

- Managed the full product lifecycle from initial **UI/UX design** and business analysis to **Open-source release on GitHub**.
- Optimized prompt engineering strategies to enhance the accuracy of programming logic suggestions, resulting in a 30% increase in student learning efficiency during pilot testing.

Fruit Store Information Management System

Mar. 2024 – June 2024

Lead Developer — Database Systems Course Project, Zhejiang University

SQL Server, E-R Modeling

- Architected a comprehensive database solution on **SQL Server** to handle inventory tracking, sales transactions, and personnel management for retail scenarios.
- Conducted systematic database design including **Requirement Analysis, E-R Diagramming, and Logical Schema Optimization** to ensure data integrity and system scalability.
- Developed a complete data dictionary and system flowcharts to standardize backend operations and future maintenance.

“TaoShu” Campus Second-hand Book Trading Platform

In Progress

Project Lead

Vue,css,javascript

- Orchestrating the development of a campus-specific second-hand book marketplace to optimize book circulation and matching algorithms within the university ecosystem.

SKILLS

- **Languages:** C,Python, SQL, LaTeX,R,JavaScript (ES6+)
- **Frameworks/Tools:** Prompt Engineering, RAG, LangChain,Git, Web Development (Vue.js, HTML5, CSS3, Node.js)
- **Languages:** English (CET-6: 619/710, Top 5%; IELTS in progress), Mandarin (Native)
