EDUCATION

Zhejiang University (ZJU) Hangzhou, China
B.S. in BusinessBigDataAnalysis Sept. 2023 – June 2027 (Expected)
(Statistics–DoubleDegreeinInformationManagementandInformationSystem)

- **GPA:** 3.73/4.3
- **Selected Coursework:** Throughout my undergraduate studies, I have built a robust academic foundation by completing a rigorous curriculum. This includes core mathematics such as Mathematical Analysis, Linear Algebra, and Probability & Stochastic Processes, alongside specialized CS courses including Data Structures, Computer Networks, and Database Systems. Furthermore, I have developed advanced technical expertise in Data Mining, Unstructured Data Analysis, and Data Visualization, complemented by hands-on proficiency in C, Python, and Web Development.

AWARDS & HONORS

- **Gold Medal**, China International College Students' Innovation Competition (Zhejiang) 2025
- **Third Prize**, 17th Chinese Mathematics Competitions (CMC) 2025
- **Second Prize**, RoboRoarZ Robotics Competition, Singapore 2024
- **Second Prize**, ZJU Intelligent Robot Design Competition 2024
- Outstanding Student Honor & Academic Excellence Scholarship, ZJU 2024

PROJECT EXPERIENCE

RAG-based Academic Literature Retrieval Engine Jan. 2026 – Present
Core Developer — Zhejiang University AIMLab Innovation Project **Python, LLM, Vector DB**

- Developed an advanced retrieval system utilizing **Retrieval-Augmented Generation (RAG)** to facilitate efficient academic discovery across tens of thousands of research papers.
- Implemented **Semantic Search** and **Vector Database** integration to achieve high-precision context retrieval for complex academic queries.
- Integrated Large Language Models (LLMs) to automate the synthesis of literature and generate intelligent explanations, streamlining the research workflow for scholars.

“TaoShu” Campus Second-hand Book Trading Platform Feb.2026-Jul.2026
Project Lead **Vue,css,javascript**

- Orchestrating the development of a campus-specific second-hand book marketplace to optimize book circulation and matching algorithms within the university ecosystem.
Buildaknowledgecommunityfeaturingonlinetransactions,real-timechat,classschedulelookup,knowledgeforums, andotherfeatures.

AI Teaching Assistant Extension for PTA Platform Jan. 2025 – Dec. 2025
productoperation— University-level SRTP Project, Zhejiang University **JavaScript, LLM, Web Dev**

- Designed and deployed a commercialized AI+Education browser extension, providing real-time debugging feedback and personalized learning suggestions for students on the PTA programming platform.
- Managed the full product lifecycle from initial **UI/UX design** and business analysis to **Open-source release on GitHub**.

Internship

Product Manager

July 2025–August 2025;

China CITIC Bank, Hangzhou

Assist the Retail Department in compiling and consolidating key performance indicators including customer traffic, conversion rates, and customer retention rates to support business decision-making; participate in the preparation of departmental training programs, overseeing the entire process—from agenda development and material preparation to personnel coordination and venue arrangement; assist in coordinating with relevant departments to advance cross-functional collaboration projects, monitor project progress, identify and resolve bottlenecks, and ensure the smooth implementation of all tasks; draft departmental business strategy reports and various specialized operational analysis documents, analyze current business trends, identify existing challenges, and propose targeted improvement initiatives.

Intern

July 2024–August 2024;

Economic Information Division, Liangzhu Subdistrict

Participated in internal data cleansing and integration tasks within the division; was responsible for classifying, validating, and conducting basic analysis of relevant business data to ensure information accuracy, compliance with formatting standards and timely updates; additionally, assisted in advancing the implementation of key subdistrict-level initiatives, including supporting the preparation for special campaigns, compiling documentation, tracking progress, and handling routine cross-departmental coordination tasks. Furthermore, actively attended various work meetings, diligently recorded key discussion points, proactively studied policy documents and grassroots governance practices, and gradually gained a comprehensive understanding of the local area's overall situation, population structure, resource distribution, and pressing public welfare issues through meeting discussions and field visits. During the internship, owing to my diligent and conscientious work ethic, meticulous and responsible approach to tasks, and strong teamwork skills, I was honored with the "Outstanding Intern" title by Yuhang District.

SKILLS

- **Languages:** C, Python, SQL, LaTeX, R, JavaScript (ES6+)
- **Frameworks/Tools:** Prompt Engineering, RAG, LangChain, Git, Web Development (Vue.js, HTML5, CSS3, Node.js)
- **Languages:** English (CET-6: 619/710, Top 5%; IELTS in progress), Mandarin (Native)
